

Muhammed Salama

Backend Engineer | Laravel & PHP Specialist | REST API Architect | Open-Source Package Author

Cairo, Egypt | +20 111 157 0436 | devmuhammedsalama@gmail.com | linkedin.com/in/mohamed2050 |
github.com/Muhammed2024Salama | packagist.org/packages/muhammedsalama/laravel-base | **Open to Remote Roles**

PROFESSIONAL SUMMARY

Backend Engineer with 5+ years of experience (including training and freelance) building production-grade enterprise systems serving users across Egypt, UAE, and Saudi Arabia. Specialized in Laravel, PHP 8.2/8.3, REST API design, Clean Architecture, and scalable distributed systems. Author of **laravel-base** — a published Laravel open-source package on Packagist (v3.0.1, featured on Laravel News) that scaffolds complete CRUD modules from a single Artisan command: Model, Migration, Enum, Filter+Pagination, Interface, Repository, Service, Form Requests, API Resource, Policy, Swagger/OpenAPI Controller, and PHPUnit Tests. Delivered 200+ REST API endpoints across real estate, logistics, CRM, and AI-integrated platforms including OpenAI streaming APIs and real-time WebSocket systems. Strong background in cross-timezone remote collaboration, TDD, and automated CI/CD pipelines.

TECHNICAL SKILLS

Languages:	PHP 8.2, PHP 8.3, SQL, JavaScript (ES6+), Bash
Frameworks:	Laravel 10/11/12/13, Livewire, Laravel Echo, Laravel Excel, Laravel Sanctum
Databases:	MySQL, PostgreSQL, SQLite, Redis — Query Optimization, Indexing, Schema Design, Performance Tuning
API Development:	REST API Design, OpenAPI 3.0, Swagger, Scribe, Sanctum Authentication, OpenAI Streaming API, API-First Development
Real-Time Systems:	WebSockets, Pusher, Laravel Echo, Server-Sent Events (SSE), Broadcasting, Event-Driven Architecture
Architecture:	Clean Architecture, SOLID Principles, Repository Pattern, Service Layer, DTO, Observers, RBAC, Polymorphic Relationships, MVC, OOP
Testing & Quality:	PHPUnit, Orchestra Testbench, Larastan, PHPStan Static Analysis, Feature Testing, Unit Testing, TDD, Code Review
DevOps & Tooling:	Docker, Git, GitHub Actions, CI/CD Pipelines, Composer, Packagist, Postman, Ubuntu, Nginx
Integrations:	Pusher, Zoom API, WhatsApp API, Amazon S3, OpenAI API
Methodologies:	Agile, Scrum, Semantic Versioning, Test-Driven Development (TDD)

PROFESSIONAL EXPERIENCE

Backend Engineer

Al Ula Company (Blue Wide World) | Riyadh, Saudi Arabia / Cairo, Egypt | September 2025 – Present

- Develop and maintain enterprise Laravel systems across multiple production platforms including bww.agency, bww-tech.bww-store.com, and bww-store.com, supporting thousands of active users.
- Build automated Artisan command-line tools for recurring business operations and scheduled tasks, reducing manual workload and improving operational efficiency.
- Implement real-time notification features using Pusher and Laravel Echo for live event broadcasting across distributed services.
- Write PHPUnit unit and feature tests to enforce code quality and prevent regressions in production deployments.
- Optimize MySQL and PostgreSQL database performance through query analysis, indexing strategies, and schema refinement.
- Collaborate with cross-functional teams across two time zones using Agile/Scrum methodologies to deliver core features and resolve production issues.

Backend Engineer

Elite BRICKS Real Estate Brokers LLC | Dubai, UAE (Remote) | January 2025 – June 2025

- Architected a scalable Laravel 11 backend using Clean Architecture with custom Artisan generators (make:interface, make:repository, make:service), reducing boilerplate code by 40% and accelerating team development velocity.

- Built a secure real-time messaging system using Laravel Echo, WebSockets, and Pusher with private channels, read receipts, file attachments, and paginated message history — achieving message latency under 500ms.
- Designed a relational database schema with 15+ entities and 50+ structured migrations using enums and foreign keys; implemented activity logging via model observers for full audit trails.
- Developed an Excel import/export engine using Laravel Excel to process 10,000+ records with strict validation (regex, enums, foreign keys), saving 25+ hours/month of manual data entry.
- Engineered reusable backend components across 80+ API endpoints including a standardized ResponseHelper and ImageUploadTrait with image processing and Amazon S3 integration.
- Tech Stack: PHP 8.3, Laravel 11, MySQL, Redis, REST APIs, WebSockets, Docker, Git, Ubuntu.

Backend Developer

AiTech | Cairo, Egypt | August 2024 – December 2024

- Built CRM platform features using Laravel and REST APIs to support customer management workflows for enterprise clients.
- Improved application performance by optimizing slow database queries and applying indexing strategies, reducing average API response time on key endpoints.
- Implemented authentication, input validation, and data integrity layers across multiple application modules.
- Participated in code reviews and contributed to maintaining a clean, well-documented codebase aligned with SOLID principles.

Backend Mentor and Trainer

Itrax Academy | Cairo, Egypt | July 2021 – December 2021

- Trained junior developers in Laravel, PHP, and MySQL through structured curricula and hands-on real-world projects.
- Conducted code reviews and provided technical mentorship focused on production-ready development practices.
- Prepared practical learning materials and guided students through building complete backend systems.

OPEN-SOURCE CONTRIBUTIONS

laravel-base — Published Laravel Package (v3.0.1 · Featured on Laravel News)

packagist.org/packages/muhammedsalama/laravel-base | github.com/Muhammed2024Salama/LaravelBase

- Authored and published a production-ready Laravel package that generates complete CRUD modules from a single Artisan command following Clean Architecture principles.
- Scaffolds: Model, Migration, Enum, Filter+Pagination, Interface, Repository, Service, Form Requests, API Resource, Policy, Swagger/OpenAPI annotated Controller, and PHPUnit Tests.
- Multi-version support for Laravel 10, 11, 12, and 13 with PHP 8.1/8.2/8.3 compatibility matrix enforced through automated CI/CD testing via GitHub Actions.
- Driver-aware database operations supporting MySQL, PostgreSQL (ILIKE), and SQLite from a unified API; security hardening with path traversal protection and input validation.
- Follows Semantic Versioning with full CHANGELOG, upgrade guides, and stub-publishing for developer customization.

Additional Open-Source Projects

- ChatMessage: Real-time messaging REST API in Laravel using Repository pattern and Pusher. 22+ GitHub stars, 10+ forks.
- Laravel Repository-Service Pattern: Educational repository demonstrating Clean Architecture in Laravel. 17+ GitHub stars.
- Zoom Integration for PHP: Composer package for integrating Zoom Meeting API into PHP applications.

KEY PROJECTS

P-Adviser — Real Estate Enterprise Platform with AI Integration

api.p-adviser.com/docs | dashboard.p-adviser.com

- Architected and documented 200+ REST API endpoints across 25+ modules: properties, reservations, payments, developers, projects, locations, and user management.
- Integrated OpenAI streaming APIs for a contextual real-estate AI assistant supporting chat, voice bot, and real-time audio transcription via Server-Sent Events (SSE).

- Implemented polymorphic relationships for flexible entity associations and a full RBAC system with granular role-based permissions.
- Designed geospatial property search features using tile bounds and zoom-level filtering on map data.
- Produced comprehensive API documentation using Scribe with OpenAPI specification export and multi-language code samples.

XSpeed — Shipping and Logistics Management System (Freelance)

api.exspeeds.com | exspeeds.com | Laravel 12

- Delivered a complete shipping and logistics backend platform with 20+ documented REST API endpoints.
- Implemented Sanctum authentication, shipment tracking, expense management, and financial reporting modules.
- Designed an optimized relational database schema, bulk import/export functionality, and managed full production deployment.

EDUCATION

Bachelor of Arts, English Department

Menoufia University | Egypt | 2015 – 2020

CERTIFICATIONS & TRAINING

- Backend Developer Diploma — Mahara Tech (2022–2023)
- Backend Developer Diploma — Itrax Academy (2021)
- Backend Developer Diploma — EraaSoft (2020)
- Backend Development Workshop — Leipzig, Germany (2022)

LANGUAGES

English: Professional Working Proficiency | Arabic: Native
